HTML5 / CSS3 / JavaScript / NPM / GIT (Git Hub) / React / NodeJS/Express.js / MongoDB/Mongoose / Testing with Jest / End-to-End testing - Cypress / react testing library / Jira / Figma / JSON / Redux toolkit / React Router Dom / Axios / Visual Studio Code / Sass / Tailwind / Postman / REST / C / C++

PROJECTS

Application for freelancers to generate invoice

Fullstack application using MERN stack ,where the user can generate invoice can add new clients, edit or delete them . You can view all invoices generated, issued or collected and can sort them by date. Both the clients and the invoices are stored in a cloud database, using Mongodb Atlas, and the information reaches the server where it is verified.

Apps displayed on portfolio website

SocialMedia App

Fullstack social media App where the client can create an account, post pictures where other friends can see them. The user can add a profile picture, comment on the posts of other users, add them as friends. The user can also visit the profile of other people where he can find more information about him. The application uses express and mongoose as a server to store the profile picture and user information

Support Ticket App

Support Ticket is a full stack application using React for client-side and express with mongoDb for server-side.

-User can login or register ,access his account which is stored in a cloud database using MongoDb Atlas for storing

-User can create a ticket if he have a problem with one of the products

-User can interact with admin for more support in a notes system for every ticket

-Using react-redux for global data

Github Profile Finder

I create an app that uses Github Api where you can find users profile where you can see his profile and repos ,if he is up to work ,his site and followers.

-React app using context and reducers to manipulate global data and axios to fetch data from Github Api

-Easy to use and friendly user interface

Ecommerce website

E-commerce website using Nextjs and sanity for proccesing information and storage ,where you can edit the content for client side .I've used nextjs and tailwind css for frontend and for processing paymant Stripe . You can view diferrent products ,add them to cart and then to buy them with cool animation after .

Admin Dashboard

Fullstack MERN application displaying a nice looking admin dashboard with cool looking design where you can see all users ,different charts and other information.

Grade book
[2022 – Current]

Fullstack MERN application for students and teachers.In progess
